

CAPITAL SHOULD BE INDUSTRIAL CENTER, SAYS TRADE BOARD

Washington is to be one of the leading industrial and mercantile centers of the world if the movement on foot today by the Board of Trade can be successfully carried out.

"I see no reason why Washington should not take rank with the leading capitals of Europe as an industrial as well as a residential city," said Isaac Gans, chairman of the committee on industrial interest of the Board of Trade today. "If the city is to make the present increase of population permanent we must offer opportunities which will hold the newcomers here. There are plenty of sites near Washington, such as the Anacostia flats, where factories could be operated to advantage."

At a meeting of the committee last night the industrial nature of the capital was discussed at length, and it was decided that the proposition be recommended in the annual report to the board. The questions of housing the many people who are coming to Washington and the night schools were also taken up. The committee is to meet again Tuesday for further consideration of industrial Washington.

LAST ALEXANDRIANS TO CAMP.

ALEXANDRIA, Va., Oct. 30.—Thirty-seven drafted men reported to the local examining board here today for final instructions preparatory to their departure for Camp Lee, at Petersburg, tomorrow. This number will complete Alexandria's quota of 153 drafted men.

Write or call for our new and interesting booklet, "Your Eyes."

No. 4 of a Series of Eye Talks

Our Next Talk Next Tuesday

If you have been wearing the same glasses for several years, it may be very necessary that a change be made.

Many people who wear glasses do not realize the fact that it is necessary to have their eyes examined at regular intervals.

Just as necessary as consulting the dentist, lenses that were right when you got them may be too "young" for you now.

This often causes suffering—and sometimes injury—and yet can be easily prevented by taking action early enough.

If you experience the least trouble of this kind, consult an oculist, that the correct lenses may be prescribed.

Then be sure that the Optician who fills your prescription is one qualified by ability and long experience to fill it correctly.

G. L. Hulse
OPTICAL CO.

1429 H Street N.W.

We do NOT examine eyes. "This Talk" from a copyrighted series. All rights reserved.

Flag of the "Rainbows" Being Presented

The Forty-second Division, United States Infantry, is here being presented with a banner bearing various devices identifying this great unit of the United States army—the Rainbow Division. The flag was presented at Camp Mills, Mineola, by Mrs. William Cumming Story, former president of the Daughters of the American Revolution. Field regulations of our army prohibit its being carried in battle, but in all parades and reviews it will appear with the colors of the republic.

Photo shows, left to right: General Lenihan, commander of the Eighty-third Brigade; General Mann, commander of the Forty-second United States Infantry; Mrs. Cumming Story and Mrs. Livingston R. Schuyler, who is speaking. In the background an orderly holds the flag.

MISSIONARY UNION TO REJOICE OVER SALOONS' PASSING

To celebrate with prayer and praise the passing of saloons from Washington, the Woman's Interdenominational Missionary Union of the District of Columbia will meet at the Mt. Vernon Place M. E. Church Friday afternoon at 2 o'clock. This branch has for its special aim the relief of destitute lepers in all parts of the world.

The Rev. Dr. J. E. Walker, of the "Billy" Sunday party, will speak on "Co-operation Through the Cottage Prayer Meeting." Mrs. W. F. Crafts, of the First Presbyterian Church, will deliver a lecture on "The Lure of Africa," the first of a series of such lectures which she will deliver before the society. Mrs. J. P. Kiechling, business manager of the "Lutheran Woman's Work," will speak on the missionary work of her denomination.

At this meeting offerings for leper relief in heathen lands will be received. Mrs. John Newton Culbertson, president of the society, will officiate at Friday's meeting.

U. S. ENGINEERS FIND POILUS START TRAINS BY HORN

By NEWTON C. FARNE.

WITH THE AMERICAN ARMY IN FRANCE, Oct. 30.—It was no easy job for American railway men—experts in their own lines—to take over and operate some of the military railroads of France.

The first contingent that arrived behind the French front and went into training found that out in a hurry. They learned, for instance, that starting a French train is something different from getting a Santa Fe flyer or Long Island suburban under way. Each French conductor has a horn. He waves his arm sideways and tools. The engineer looks things over and whistles if he is ready to start. That puts it up to the station agent. The station agent looks things over and blows his whistle. The party is off.

More Difficulties.

Railroading near the front increases the difficulties. If there has been an air raid just ahead, the engineer cuts down to a walk while a track walker covers every yard of ground to preclude chance of wreckage. Military trains get their share of German aviators' attention. Only recently a train under the operation of American engineers was pursued and bombarded at night by a German plane, which brought its machine gun into play every time a burst from the firebox revealed a target. The crew brought the train to a halt and took refuge under the locomotive. The German was either baffled by this maneuver or his bomb supply exhausted. He flew away, and after a short halt the train proceeded.

As a precaution against air raids, bombproof and deep trenches have been dug near the barracks housing the first American engineer force in service near the French front. When the warning signal was sounded one night recently a sergeant led the way. He landed in a trench with his steel helmet and gas mask, but completely sans clothes.

Plans are under way today by the Chamber of Commerce to relieve the lodgings problem which newcomers to Washington are finding so serious.

A bureau is to be established where rooms for rent may be listed and the facilities of the Chamber will be placed at the service of all young men and women who are coming to the Capital to enter the Government service.

At a special meeting of the directors of the Chamber yesterday the movement to provide a community Thanksgiving dinner for soldiers training near Washington, which was inaugurated by Isaac Gans, was unanimously endorsed. The dinner is to be held in some room which will accommodate a large number of the fighting men and where dancing can follow. A committee is to be named by A. Leftwich Sinclair, president of the Chamber, to co-operate with local societies in making the affair a success.

Regret at the death of James Lansburgh was expressed in resolutions.

NEW WAR TAXES BEGIN THURSDAY; HERE'S PROGRAM

Life is going to be just one war tax after another for Mr. Average Man of Here-and-Elsewhere, U. S. A., after tomorrow. From the moment he leaves his home in bathtub and goes to his place of employment he will have a 3 per cent tax on his wages until the bedtime hour, when he lays aside his 1 per cent tax "nightcap" cigar, plays his "good-night" game of chess with his wife on a 2 per cent tax chess board and deposits his 3 per cent tax collar button and studs on the dresser preparatory to lay himself down to forgetful dreams, he will be contributing at every turn to the big fund Uncle Sam is raising to "make the world safe for democracy."

On the way to catch his train or car for the office he will drop into the nearest tobacco or stationery store and pay a tax of a cent on his after-breakfast smoke, provided, of course, it costs him 25 cents or more.

Hello, 5 Cents, Please.

If by this time he has missed his car or train and he feels impelled to call up his office—if he has to resort to long distance wire to announce the fact that he will be late, a sweet voiced central will remind him that an additional 5 cents—the war tax again—will have to be rattled into the box before the connection can be made. If he should take his own or a hired automobile to make up the lost time he would have to contribute to the 3 per cent tax on the machine.

At his office he will have time, perhaps, to think over the tax on his income—the rate depending upon the size of the income—between paying other taxes every time he reaches his hand into his pocket. If he is a lawyer or if he patronizes a lawyer during the day, he will have to affix a stamp—after December 1—to the value of 5 cents upon each \$100 of bonds, debentures or certificates of indebtedness; 2 cents on each \$100 of their face value upon each promissory note; 50 cents upon each deed of conveyance of real estate for every \$500 of face value; 50 cents upon each indemnity or surety bond; 5 cents per \$100 on each stock certificate he handles during the day.

Postage Rates Raised.

If his club should ring him up for unpaid dues—and if he pay them—he will have to add an extra 10 per cent of the amount, provided they exceed \$12. If he should receive or send a birthday package by freight during the day he would have to add 8 per cent to the freight bill to cover the tax. If he sends a telegram he will have to add an extra 5 cents to cover the tax. If he chooses the letter method of communication as cheaper, Uncle Sam will still be on his trail with a requirement for a 3-cent stamp instead of a "two" or two instead of one for a postal card.

If the mounting bill should get the better of his philosophy and he should call on his country club for a game of golf he would still be a "villain pursued." All new golf sticks and balls—if he played golf—would be taxed 3 per cent, or if he went in for tennis he would have to bear a 3 per cent tax on the racquets. Or say a friend invited him out for a trip up the sound instead of to the country club; he would call on a boatman and find he measured not more than fifty feet in length. If he snapped any pictures along the way he would have to contribute to the 3 per cent tax on cameras.

But, laying aside these suppositions, suppose that Mr. Average Man does his bit in his office as usual, and returns to his home tired and in need of relaxation. Suppose that his wife insists on taking him out to the theater or the "movie." Old Ten Per Cent Tax would be at the box office window with the same inexorable demand.

Even Canard Must Pay.

Not even the dead will escape taxation under the new law. Extra taxes in addition to the existing inheritance, succession taxes must be paid on the estates of all persons dying after November 3, a tax of 1 per cent being imposed on all between \$25,000 and \$50,000, and so on progressively until a total inheritance tax of 25 per cent is imposed on estates exceeding \$100,000 in value.

Manufacturers of automobiles, jewelry, patent medicines, phonographs, records, sporting goods, toilet articles and films must pay a tax of 2 to 3 per cent on the selling price.

Munition manufacturers will have to turn over 10 per cent of their net profits to the Government to be used for war taxes. This is in addition to the various other taxes imposed on manufacturers of war explosives or implements.

A war tax will be clamped on all intoxicating liquors. The rate will be \$1.50 a barrel on beer, 20 cents a gallon on whisky, 3 cents a half-gallon on champagne, and \$2.10 a gallon on distilled liquors.

The postage war tax becomes effective on November 3. The rest of the three machine gun companies, which will be given by the three companies of the machine gun battalion.

General Kuhn has announced that the soldiers will be given a half-holiday at noon tomorrow for Halloween games and to prepare for the evening's fun. Admission to Camp Meade will be without passes for families and friends of the soldiers. Athletic games will be held in the afternoon. In the evening there will be a reception, entertainment and dance.

Fifteen D. C. Men To Go To France.

The identity of the fortunate fifteen is withheld in line with the policy of the army authorities to shield troop movements. General Kuhn is under orders to leave Camp Meade, but his destination also is withheld. Brigadier General Nicholson will be in command during General Kuhn's absence.

Trench operations will begin at Camp Meade soon. A complete trench system, with communicating trenches, with first-line trenches facing a "no man's land," dugouts for officers and men, barbed wire entanglements and all accessories will be constructed.

GOVERNOR'S WIFE KILLED.

WILMINGTON, Del., Oct. 30.—Mrs. John G. Townsend, wife of Governor Townsend of this State, is dead as the result of an automobile accident. The machine in which she and the executive were riding was while running along Dupont Boulevard.

The governor was only slightly injured. The accident occurred when the governor applied the brakes too suddenly on a slippery road in order to avoid striking a team of horses.

Christens First Ship For U. S.-Chile Trade

SENORA DE ALDUNATE, Wife of the Chilean Ambassador, who consented to christen the first ship of a fleet which will operate between American and Chilean ports through the Panama Canal. The launching took place at an Atlantic coast shipyard.

DISCRIMINATION IN SELLING COAL TO BE DISCONTINUED

Newcomers to the District, newly wed, and others who have been unable to obtain coal to meet their needs, are to be supplied by Washington dealers.

Plans for the equitable supply of these new customers are being worked out by the coal men today. This action followed a conference of the advisory committee of coal men with Federal Fuel Administrator John L. Weaver yesterday. Mr. Weaver, old members of the committee of the necessity of supplying these people who had been denied supplies under the policy of the coal men in supplying their old customers.

The conference discussed coal prices in Washington and the methods of determining costs and profits for all of the dealers.

Even Distribution.

The committee of coal men is to work out plans for even and equitable distribution of the supply in the District, and to recommend to the fuel administrator the prices to be charged.

Members of the committee are J. M. Burrell, James H. Campbell, W. W. Griffith, William King, and W. Hamilton Smith.

The fuel administration has under consideration plans for cutting down the supply of coal for manufacturers and out luxuries and of limiting the electric signs for advertising purposes as a coal conservation measure.

Make Industry Census.

Members of the national fuel administration staff are compiling a census of industry, in which each will be rated on the urgency of its output. Those essential to war will head the coal supply list; the others will be arranged in order down to needless luxuries. Signs from New York and other cities in conference here, pointed out to Dr. Garfield yesterday that the signs used excess current almost entirely. No decision has been reached with respect to them.
